WHAT DID WE DO ?

A scientometric review of the landscape & trend of published Semantic Mining research

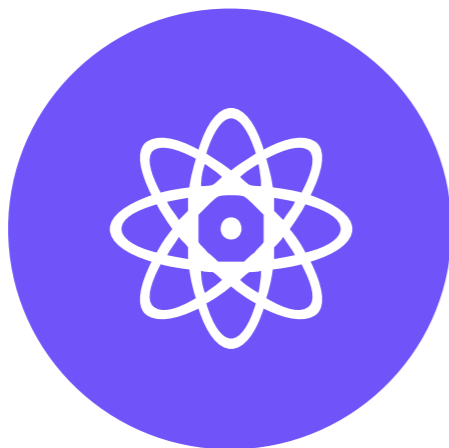

scientific outputs

geographical distribution & international cooperation

distribution of subjects

co-citation analysis

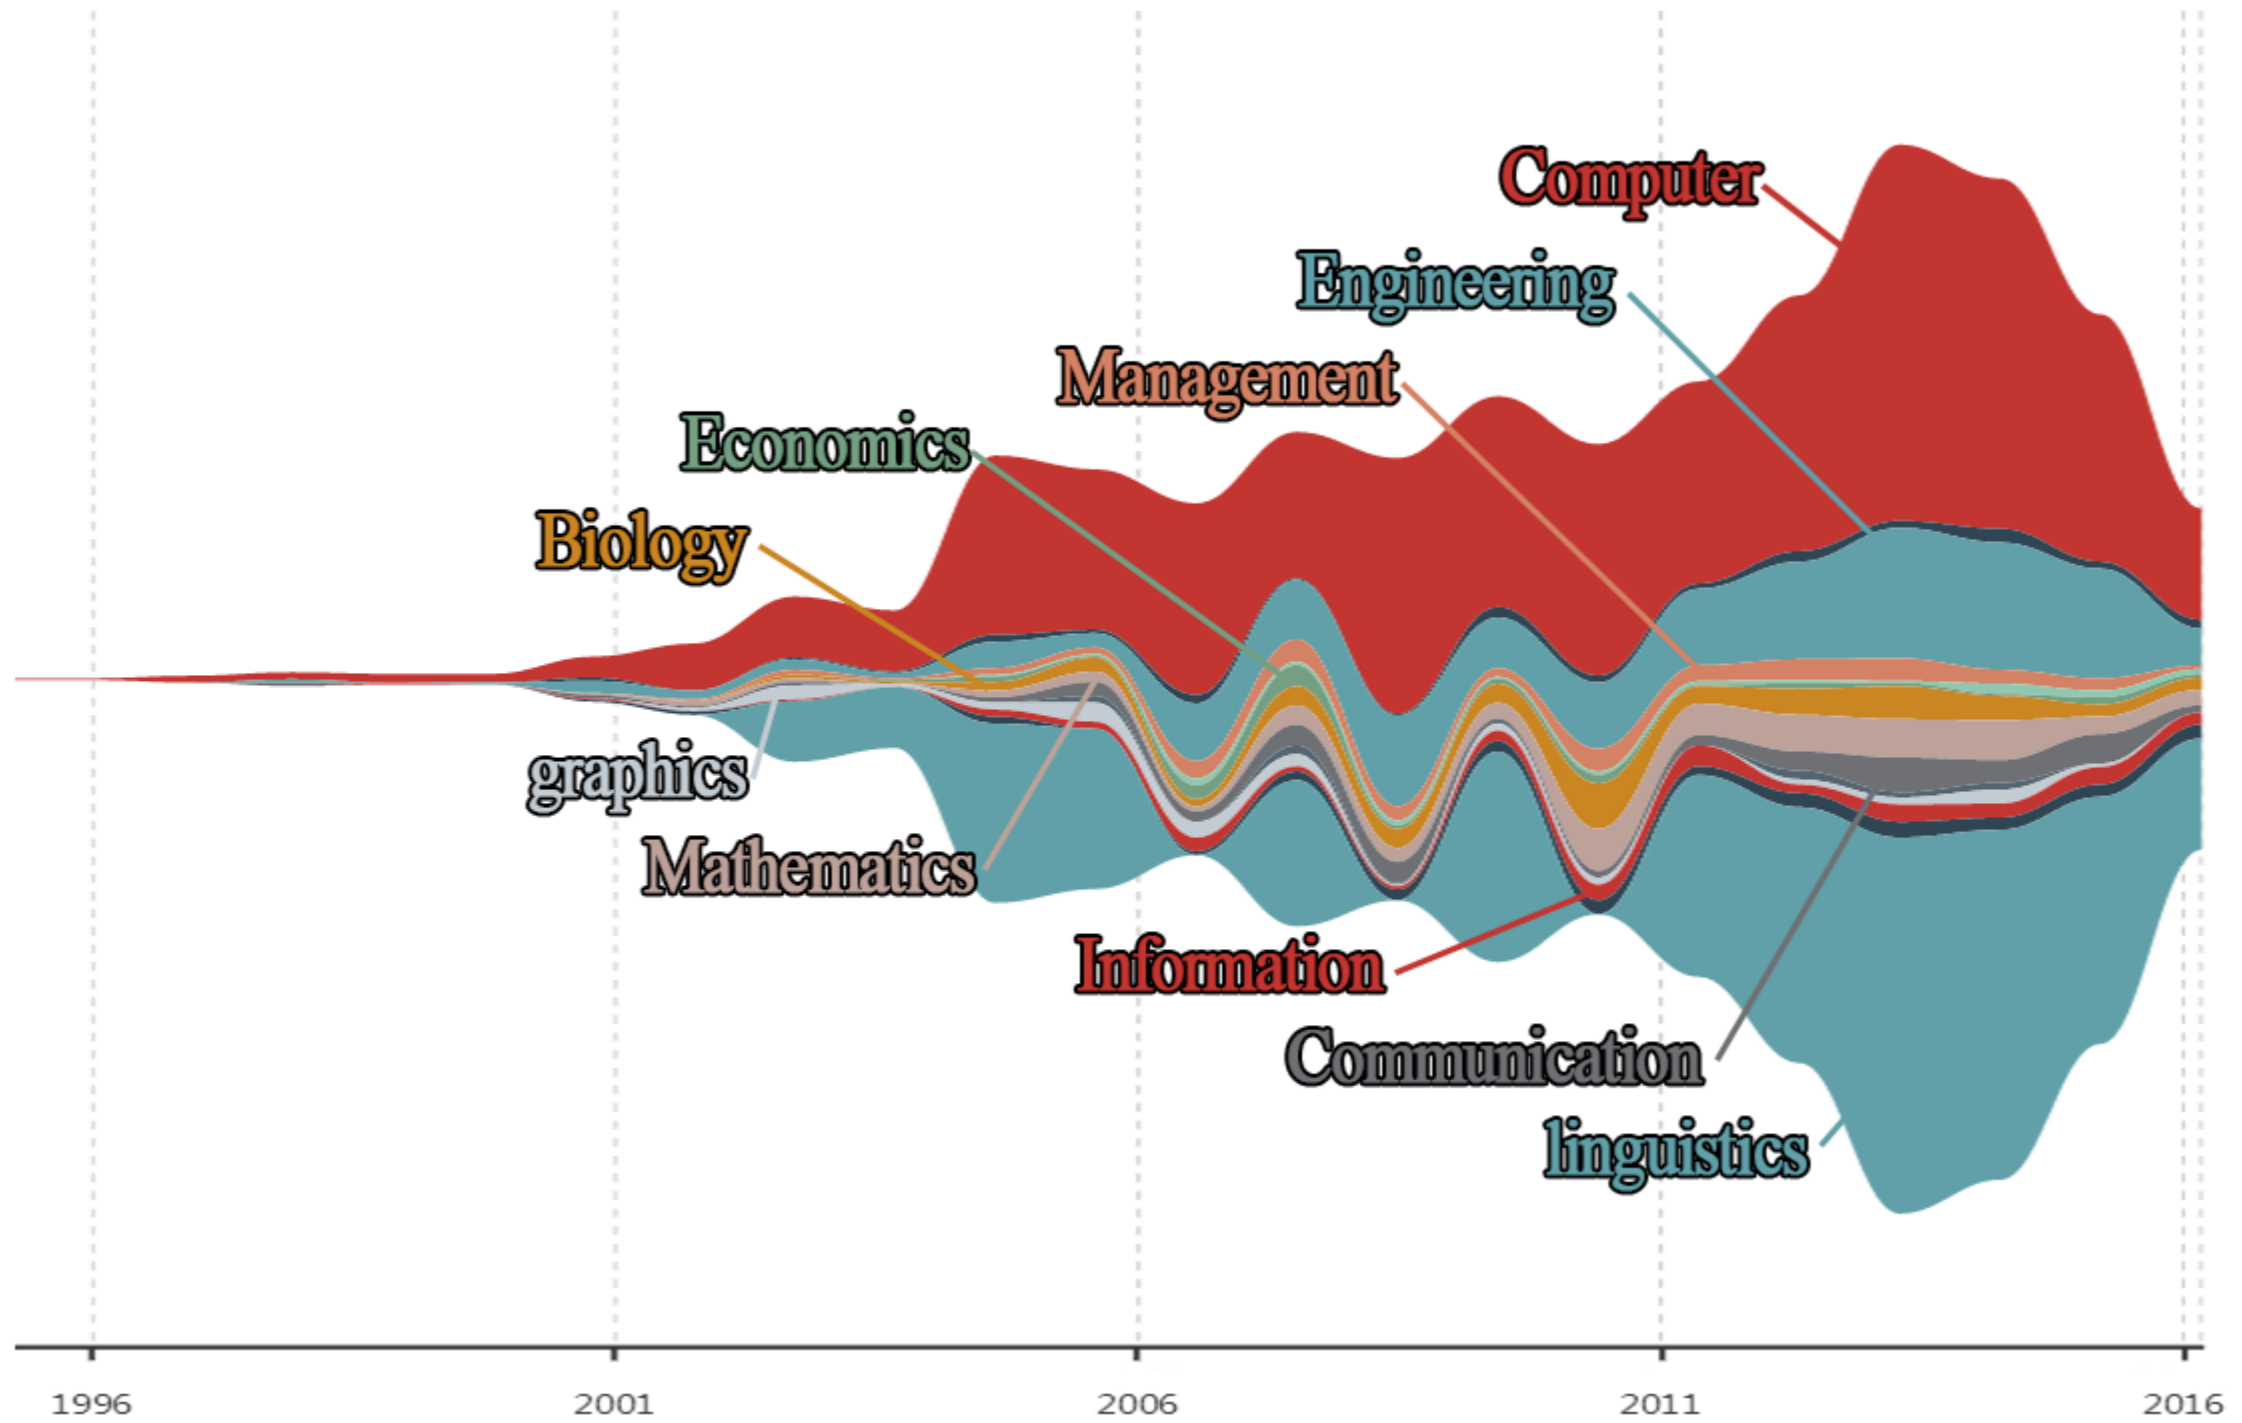

keyword semantic clustering

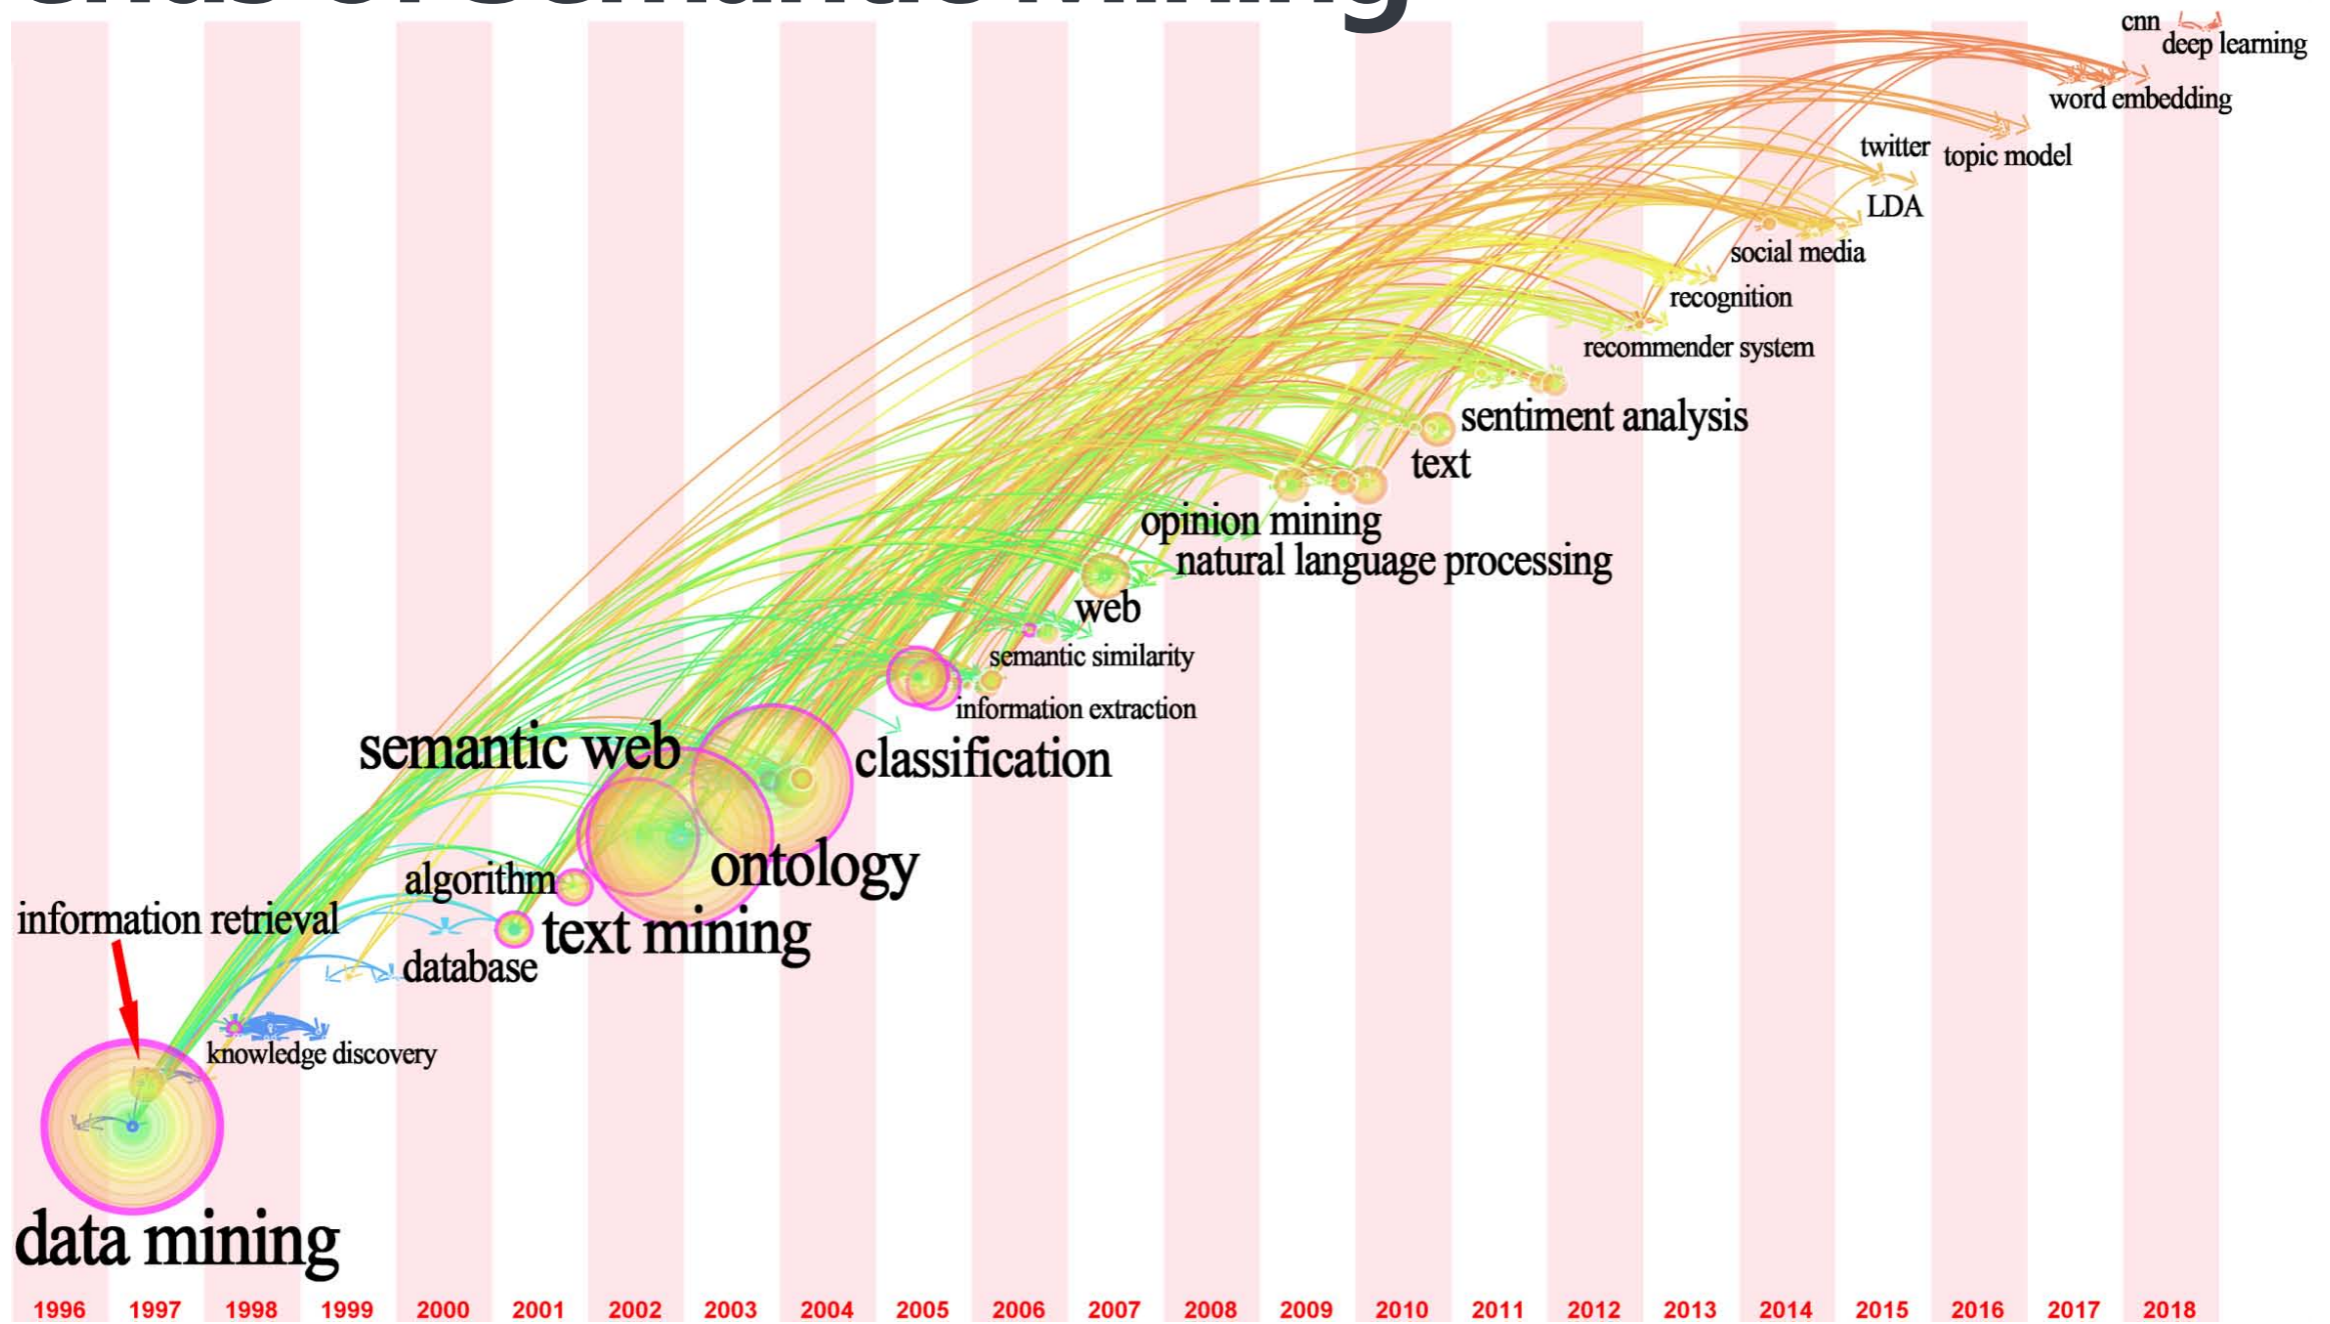

Knowledge Evolution

Characters of Subject Distribution

River chart of subject distribution (1991-2017)

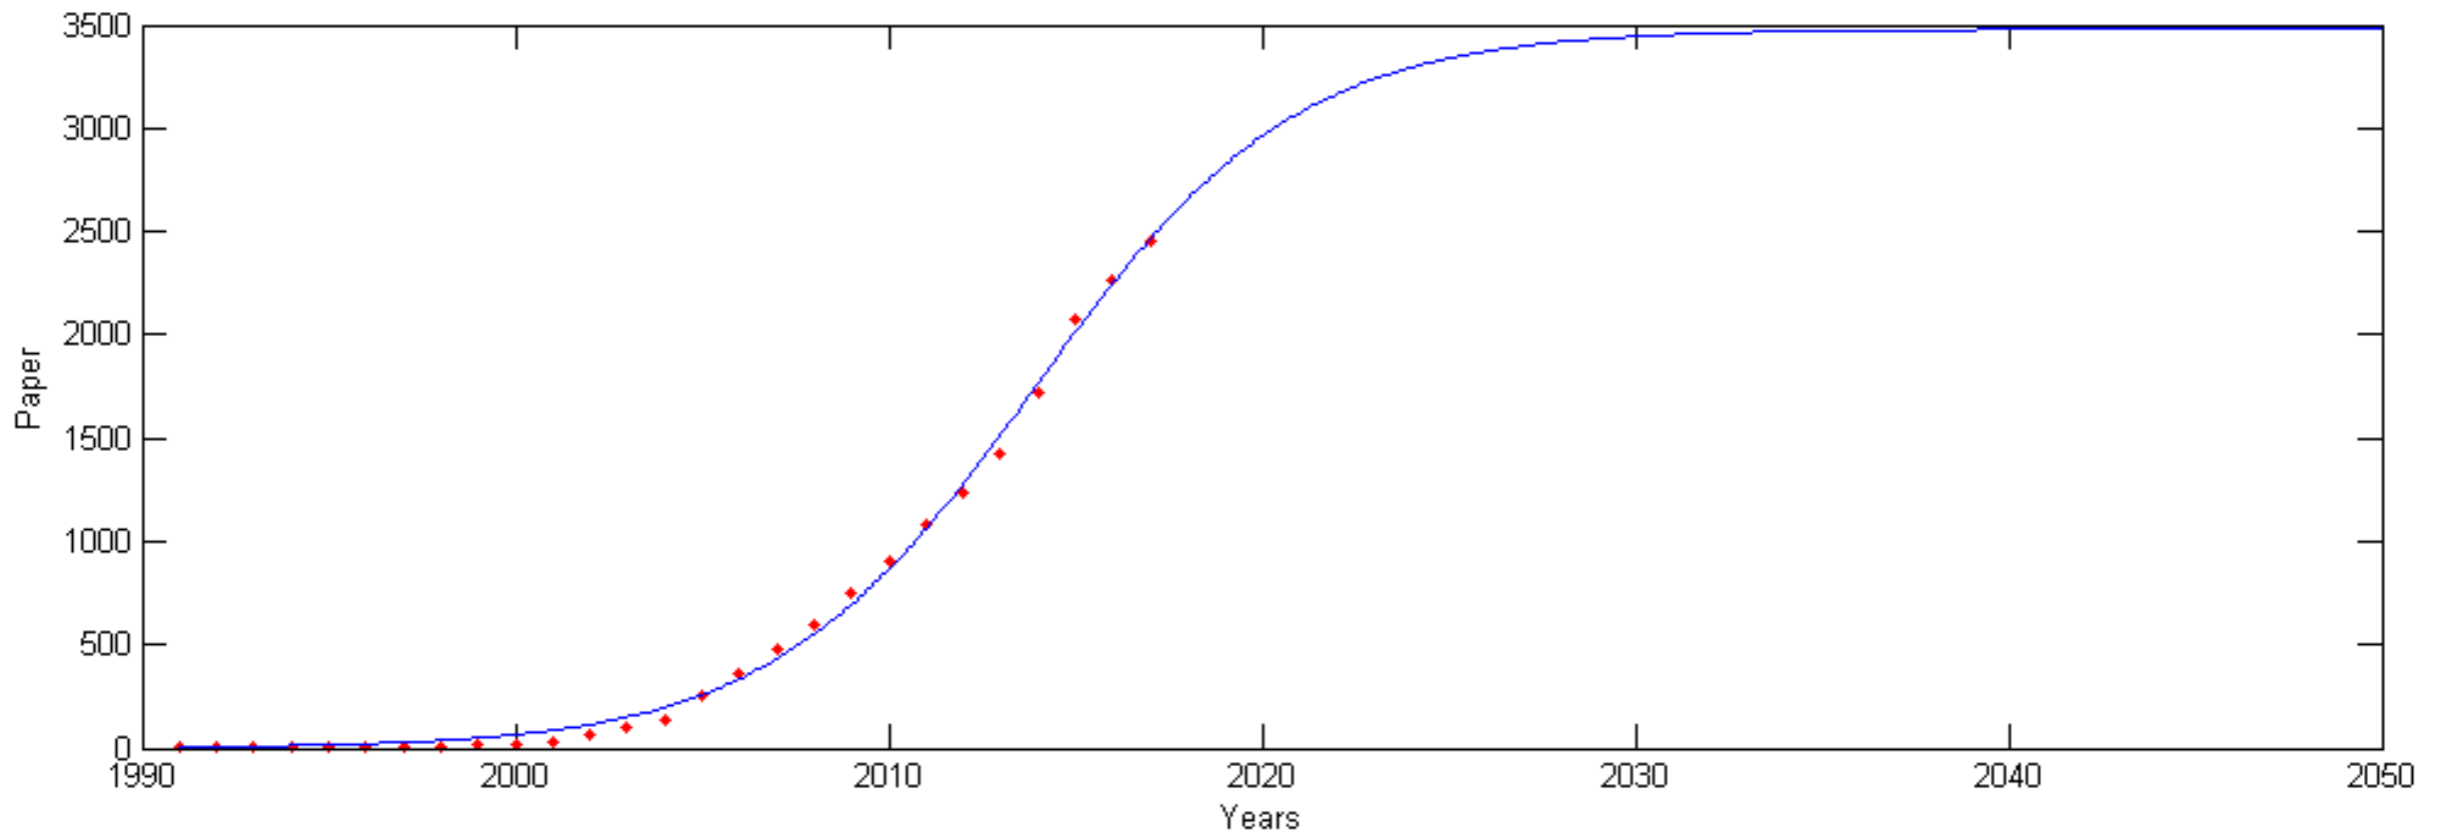

Research Hotspots and Emerging Trends of Semantic Mining

Temporal Graph of Research Fronts in Semantic Mining

Scientific Outputs of Semantic Mining Research

The general formula of the Logistic curve : $y = a / (1 + be^{-cx})$

Logistic curve of Article Number
